2.3 Development of the first relationship	40
2.4 Body language	41
2.4.1 Eye contact	41
2.4.2 Distance	42
2.4.3 Posture	44
2.4.4 Gestures	45
2.4.5 Facial expressions	45
2.4.6 Voice language	47
2.4.7 Touching	47
2.4.8 Inner body language	49
2.4.9 Hidden message in sound	49
2.4.10 Smell	49
2.4.11 Features	50
2.5 Baby communication	51
Conclusion	51

	Chapter 3. Development of the baby	53
3.1	The need to development	54
3.1.1	Contact initiatives	56
3.1.2	Initiatives for action	57
3.1.3	Initiatives of development	58
3.2	Supporting the development of the babies	61
3.3	Initiative and reception	63
3.4	Social environment	64
3.5	The importance of language supply	65
	Conclusion	66
	Chapter 4. From baby to toddler	67
4.1	Giving directions pleasantly	68
4.2	Language of toddlers	71
4.3	To divide attention	72
4.4	The toddler starts talking (by Harrie Biemans)	73
4.4.1	Talking is a part of communication in the family	73
4.4.2	Families with more or less consultation	73
4.4.3	Conversation during meals	73
4.4.4	Words in sign language	74
4.4.5	Supporting the toddler's behaviour with words	75
4.4.6	Talking is more than saying words	75
4.4.7	Rhythm and melody	75
4.4.8	The atmosphere	75
4.4.9	Intonation language	76
4.4.10	Question and answer in intonation language	76
4.4.11	Approach and distance	76
4.4.12	Intonation of sympathy	76
4.4.13	The interrogative intonation	77
4.4.14	Which words does the toddler understand?	78
4.4.15	First little words	79
4.4.16	Asking for cooperation	80
4.5	To take notice of children's questions (by Harrie Biemans)	81
4.5.1	Not only listening, giving information too	81
4.5.2	They keep asking	81
4.6	Social attention	82
	Conclusion	84
	Chapter 5. Attuning emotionally	85
5.1	Emotional development	86
5.2	Dynamic interaction	88
5.3	Attention and reception	88
5.4	Neurobiological frame	90
5.5	Attuning	92
	Conclusion	94

Chapter 6. The power of the parents	95
6.1 Intuition	96
6.2 Expertise of the parents	96
6.3 Dealing with emotions	97
6.3.1 Fear	100
6.3.2 Anger	100
6.3.3 Sorrow	101
6.3.4 Feeling of guilt, remorse	101
6.3.5 Emotions and expressions	101
6.4 Empowerment	102
6.4.1 Use of video and empowerment	103
6.5 Health scientific frame	105
6.5.1 Attribution method	105
6.5.2 Coping-response	105
6.5.3 Self-image	106
Conclusion	108
Chapter 7. Vulnerable babies	109
7.1 Risk situations	110
7.2 Risk factors	110
7.3 Protection factors	111
7.4 Premature born babies	114
7.4.1 Communication with the incubator baby (by Harrie Biemans)	118
7.5 Crying of the babies	120
7.5.1 Crying normally	120
7.5.2 Crying excessively	121
7.5.3 Child abuse	124
7.5.4 Stress and tension	125
7.6 Comforting babies and manners to comfort	125
7.6.1 Carrying the babies	126
7.6.2 To spoil	127
7.6.3 To swaddle up	129
7.7 High spirited babies	129
7.7.1 Busy babies	129
7.7.2 Early spotting	130
7.8 Multiple births	131
7.9 Future development problems	132
7.9.1 Eating problems	132
7.9.2 Sleeping problems	134
7.9.3 Constipation	135
Conclusion	136

Chapter 8. Video home training and video interaction guidance: the method	137
8.1 History	138
8.2 The method	139
8.2.1 Main points	139
8.2.2 Providing care with basic communication	141
8.2.2.1 Basic communication, cluster 1	141
8.2.2.2 Basic communication, cluster 2	144
8.3 Interaction analysis	144
8.4 Information about communication and development support	146
8.4.1 Basic elements	147
8.5 Development	149
Conclusion	152
Chapter 9. Video home training in youth health care	153
9.1 Prevention	154
9.2 Early detection of risk groups	155
9.3 Early support for groups at risk	156
9.3.1 Early support in excessive crying	156
9.3.2 Support according to need	158
9.3.3 Indication interview	159
9.4 The purpose of video home training in youth health care	161
9.5 Cooperation	161
Conclusion	162
Chapter 10. Video interaction guidance in hospital	163
10.1 A history	164
10.2 Role of VIG	165
10.3 Parents of premature babies	166
10.3.1 Indications	168
10.3.2 The guidance	168
10.4 Parents of children with a social indication	169
10.4.1 VIG with restless babies that cry excessively	170
10.4.2 VIG in other baby problems	173
10.5 Seriously and prolonged sick children	175
10.6 VIG for emotional support and prevention	177
10.7 Quality care	177
10.8 Developmental directed care	178
10.9 Communication between nurses and parents and children	179
10.10 Three goals	179
Conclusion	181
Chapter 11. Video interaction guidance at the health centre	183
11.1 The offer of VIG in a health centre	184
11.2 Target groups	184
11.3 VIG at health centre as day hospitalization	188
11.4 Intersectoral cooperation	189
Conclusion	189

Chapter 12. The training	191
12.1 The training	192
12.2 The training model	192
12.3 Video reporting: the sinking in of the information	196
12.4 The role of the video in the training	196
12.4.1 Filming	197
12.5 Reviewing with the parents	197
12.5.1 Communication with the parents	197
12.5.2 Processing the images by the parents	199
12.6 Video diagnostics	200
12.7 To talk from behind the camera	201
12.7.1 Modelling	202
12.8 VHT/VIG in the Netherlands, organization and propagation	202
Conclusion	203
Sources	205
Supplement	211
Contents and instructions for DVD	212
Justification	221
Addresses	221
