

Content

Leonardo da Vinci on science	8
Foreword Dick Swaab	9
1 Introduction	13
1.1 Induction and deduction	15
1.2 The organisation of medical science	18
1.3 The perspective of medical specialisation: four examples to illustrate new connections	19
1.3.1 <i>First example: the discovered vessel</i>	22
1.3.2 <i>Second example: melatonin, the side-effects of medication</i>	25
1.3.3 <i>Third example: connecting nomenclature elements to facilitate theory building</i>	32
1.3.4 <i>Fourth example: expanding the theoretical scope by accepting incomprehension</i>	36
2 The immune system	39
2.1 Connecting the innate and the adaptive systems	40
2.2 The schematic representation of the immune system	44
2.3 The pathways of complement activation	46
2.4 Schematic representation of the complement and the pathways	48
3 A broader perspective on the immune system	51
3.1 From fighting to protecting	51
3.2 Suppressing in order to procreate	55
3.3 From protecting to exchange	56
3.4 Programs for life and programs for death	58
3.5 Immune system strategies	59
3.6 A new pathway	60
4 A new pathway of complement activation	63
4.1 The scope of Melatonin	63
4.2 The melatonin pathway	67
5 The schematic representation of a broader perspective on the immune system	69

6	The autoimmune reactions	73
6.1	Autoimmunity as a derangement	74
6.2	From disease to protection	75
6.3	Paraneoplastic syndromes	78
6.4	The virus and autoimmune reaction	79
7	Anorexia as a case in general and specific autoimmunity	83
7.1	The etiology of eating disorders	83
7.2	The 'appetite' hormone ghrelin	84
7.3	Ghrelin levels in eating disorders	86
	7.3.1 Ghrelin pattern after test meal or intravenous glucose	86
	7.3.2 Obesity	87
	7.3.3 Bulimia Nervosa	88
	7.3.4 Anorexia Nervosa	89
	7.3.5 Binge Eating Disorder	91
	7.3.6 Summarizing graphics	92
	7.3.7 Resuming our results	94
7.4	Smelling favorite and unfavorable food and the level of ghrelin	94
7.5	The protective role of calorie restriction	96
8	Autoimmune Diseases/reactions	99
9	Evidence for autoimmune reactions	103
9.1	Methodology for finding evidence of AD	103
9.2	Method for constructing the table of autoimmune diseases, the TAD	107
9.3	The TAD Table of Autoimmune Diseases	109
10	Epilogue	111
	Acknowledgements	113
	References	115
	Appendix I	133
	Appendix II Glossary	135
	List of Outlines, Illustrations, Schemas and Figures	141
	Name index	143

Subject index	145
Authors' information	147
The PICOWO series	149
