

# Contents

Chapter 1	<b>Roots, perspectives, principles</b>	
1.1	Historical perspective	11
1.2	Conceptual development	17
1.3	A comprehensive approach	19
1.4	Basic principles	19
1.5	Rehabilitation in the field of mental health	22
1.6	Rehabilitation services	24
1.7	Rehabilitation and its evidence	26
Chapter 2	<b>Recovery, a hopeful perspective</b>	
2.1	What is recovery?	35
2.2	The word recovery and its meaning	36
2.3	Outcomes of longitudinal studies	38
2.4	A multidimensional model of recovery	41
2.5	Recovery as a developmental and self-empowering process over time	43
2.5.1	The Interactive Developmental Model of Strauss et al.	46
2.5.2	The Young & Ensing study	50
2.5.3	The Spaniol study	56
2.6	Motivation / drives for recovery	57
2.7	Developing competences	59
2.8	Social engagement / shifting the social status	62
2.9	Environmental resources	63
2.10	The concept of transition	64
2.11	Indicators and impediments	66
2.12	Conclusion	68
Chapter 3	<b>The comprehensive approach at a systems level</b>	
3.1	Providing services according to the recovery process	75
3.2	A community support system	78
3.3	A personal support system	79
3.4	Criteria for recovery oriented mental health services	82
3.5	Implementation	87
3.6	Rehabilitation competences	88
3.7	Rehabilitation professionals	90

Chapter 4	<b>The methodology of CARE</b>	
4.1	Introduction	97
4.2	Supporting recovery factors: the 5 pillars of a rehabilitation/recovery process	98
4.3	Basic features of the CARE methodology	102
4.4	The constituting elements of the CARE methodology	104
4.5	Working in 6 phases	110
4.5.1	Phase 1: Connecting and establishing a relationship	112
4.5.2	Phase 2: Rehabilitation Assessment	112
4.5.3	Phase 3: Setting rehabilitation goals	122
4.5.4	Phase 4: Planning	126
4.5.5	Phase 5: Implementation	130
4.5.6	Phase 6: Monitoring, evaluation and feedback	133
Chapter 5	<b>Personal-professional support</b>	
5.1	Basic principles	137
5.2	Personal-professional assistance	139
5.3	“Acting normal” as a profession	139
5.4	A dignified relationship	141
5.5	An empowering approach	142
5.6	Three basic principles: holding, handling, object presenting	146
5.7	Dialogue space and action space	148
5.8	Systematically building a relationship	149
5.9	Role perceptions	152
5.10	Rehabilitation roles	154
5.11	Being present	155
5.12	Narratives	156
5.13	Communication: taking impairments and disabilities into account	157
5.14	Communication strategies	160
5.15	The first contact	166
5.16	Linking up with social rituals	167
5.17	Motivation for change	169
Chapter 6	<b>Psychosocial vulnerability</b>	
6.1	Psychosocial vulnerability	175
6.2	The vulnerability-stress-coping model	176
6.3	Possible causes	179
6.4	Cognitive impairments	182

6.5	Sources of stress	185
6.6	Activity restrictions	187
6.7	Participation restrictions	190
6.8	Coping	190
6.9	Using CARE methodology dealing with vulnerability	193
6.10	Methods for improving coping	195
6.11	Symptom and medication management	196
6.12	The early warning signs plan	198

Chapter 7      **Working with the environment**

7.1	Introduction	207
7.2	The ecology of the environment	208
7.3	Social Networks	210
7.4	Using CARE methodology to work with the environment	213
7.5	Creating and using environmental resources	217
7.6	A healthy environment	217
7.7	Working on Social Inclusion	218
7.8	Working with families	222
7.9	Working with network groups	228
7.10	Buddy support	228
7.11	Peer support	229
7.12	Bridge building	232

Appendices      **Examples of tools which can be used in the CARE methodology**

1.	Client Profile	239
2.	Communication Relationship Profile	241
3.	Plan to develop a working alliance	247
4.	Individual Rehabilitation Assessment form	251
5.	Plan Models	255
6.	Monitoring and Evaluation	261
